Honors & Awards

Web Security Instructor from Green Web (IranServer)

2019

Consultant on DDoS Attacks for the Cyber Police of the Islamic Republic of Iran (FATA Police) 2021

Projects & Academic experiences

GlyphGuard Project : GlyphGuard is an IDN Homograph Detector designed to monitor DNS query logs, detect suspicious domains, and send alerts to ELK Stack and Syslog/PRTG. Protect your network from phishing and homograph attacks with real-time detection and active verification.

2025

NetPulse Project : NetPulse is an n8n workflow that allows you to receive PRTG alerts in real-time, track downtime and reasons, and send a visual daily or weekly report to Telegram.

2025

Secure-Manager-RoundTable-AI Project : A fully client-side AI orchestration interface built with React, TypeScript, and TailwindCSS. It collects responses from multiple AI models (such as ChatGPT, Gemini, Claude, and LLaMA via Ollama) and generates a final summary using ChatGPT.

2025

anti brute force Directadmin Project : Using this code can handle a large amount of brute-force attacks and will greatly reduce your concern about losing control of your control panel.

2019

CheckingServerUtilization Project : Checking the server utilization is one of the important task of an administrator, and a good administrator is one who knows how to automate his day to day task. Below is the script that will give many such information about your server. Check it yourself.
